

MATHS

Following on from last week the children have still been focusing on the numbers 1 2 3.

The children have been learning to form the numbers 1 2 3 in different ways for e.g. drawing pictures. Have your child look at the following pictures.

The first picture is the number 1 the second picture 2 and the third picture 3.

Can your children draw their own picture cards in their books and tell you what each number represents.
